## As professional photographers

we use only the highest quality professional products and services to produce your photographs. We want them to last forever and will give you that guarantee. If our photographs EVER fade or discolour, bring them back for free replacement, anytime!

Yes we can do your photographs in colour, black & white or even sepia. We sometimes use soft filter effects and specialise in low light night shots for that great sunset picture.

We place no time limits on our wedding packages and will stay to whatever time you decide. To see more photographs go to [www.malbowkerphotos.com](http://www.malbowkerphotos.com)

Your enquiry for all types of photography is welcome by phone or email. (via the website)

*....take time to enjoy it*

The **3 most important** things to ensure a perfect wedding day;

1. Find your perfect partner.
2. Buy your mother a new outfit.
3. See Mal Bowker photography.

Why do more than half of our clients come recommended by their friends or family? We have twenty years experience in wedding photography, we listen to what you want and never forget that this is your day.

As your photographer I do a lot more than just take the photos on the day. I accept the responsibility of making sure the day runs to your timetable, that your family knows where they are going for your photos and I'll try to keep your mother happy too!

We offer advice on the timing of the day and photo locations. After the traditional photos that the occasion demands, we take time with the bridal party to have some fun and capture the spirit of the day. These are the photos you will look back on in the years to come and remember the day.
